Professional Summary

AI/ML undergraduate with hands-on experience building LLM-integrated applications, multi-agent systems, and full-stack AI platforms. Passionate about developing scalable intelligent systems with real-world impact.

Education

B.Tech in Artificial Intelligence & Machine Learning	2023 – 2027
JIET University, Jodhpur CGPA: 9.47	
Neha Public Sr. Sec. School (Science)	RBSE Percentage: 86.80% 2022

Experience

AI & Generative AI Intern – YBI Foundation	June 2025 – July 2025
<i>AI Herbalist – LLM-Powered Herbal Recommendation Platform</i>	

- Developed a full-stack AI Herbalist platform integrating 1000+ medicinal herbs with a conversational chatbot that collects patient symptoms through guided intake and generates real-time herbal remedy recommendations.
- Implemented NLP-based intelligent search with synonym expansion to improve disease-to-herb matching accuracy.
- Built scalable RESTful APIs using Node.js and Express.js with caching mechanisms to reduce redundant API calls.
- Designed and deployed a live web interface featuring an interactive plant guide with structured medicinal insights.

Projects

Doctor Copilot – AI-Powered Healthcare Platform	March 2026
--	------------

- Developed a SaaS-based Hospital Management System supporting 3 user roles (Admin, Doctor, Patient), improving system efficiency by 40%.
- Integrated AI APIs (OpenAI/Gemini) to generate medical report summaries, reducing manual analysis time by 50–60%.
- Implemented real-time communication using Socket.io, enabling instant messaging with <1 second latency.
- Built interactive health dashboards using Recharts, improving data understanding and visualization.

Multi-Agent Research & Report Generation System	Aug 2025
--	----------

- Built an autonomous multi-agent system using CrewAI integrating research and writing agents.
- Achieved 93% task completion accuracy during internal evaluation testing.
- Leveraged Groq via API for structured and creative text generation.

Interactive Crime Data Visualization Dashboard (India)	Sept 2025
---	-----------

- Developed interactive dashboard using Dash and Plotly to visualize state-wise crime trends (2013–2022).
- Implemented choropleth map with dynamic filtering by crime type and year.
- Integrated click-based interactivity for state-level trend exploration.

Technical Skills

Programming: C, C++, Python, JavaScript
Backend and Framework: Node.js, Express.js, Next.js, PostgreSQL, FastAPI, MySQL
Machine Learning and Gen AI: NLP, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch
Tools: Git, GitHub, Hugging Face, VS Code, Jupyter, LLM APIs Google Colab, Linux

Certifications

- SQL for Data Science – Infosys (2024)
- Data Structures and Algorithms – Infosys & Swayam (2024)
- CS50 Python Programming – Harvard University (2024)
- Supervised Machine Learning – Stanford University (Coursera) (2025)
- Unsupervised Learning & Reinforcement Learning – Stanford University (Coursera) (2025)
- Training in AI & Generative AI – YBI Foundation (2025)

Achievements

- Gold Medalist for Academic Excellence (First Year)
- Earned Gold Badge in C++ on HackerRank
- Mathematics & Science Olympiad Certificate – School Level
